

Data sheet

Manual setting and shut off knobs

Application

The setting knob is used to manually open and shut radiator valves.

Setting knobs are available in white and in chrome surface.

Materials Knob: PBT
Socket: Polyamide

The shut off knob is a tool designed to replace the radiator thermostat when removing a radiator with which is still pressurised.

The setting knob fits all RA 2000 valve bodies. It is designed to a max. pressure of 1.000 kPa/0.6 bar.

Material Brass, Ms 58

Ordering and technical data

Product type	Valve connection	Colour	Max. diff. pressure	Max. water temp.	Code no.
Manual setting knob	Danfoss RA 2000	White, RAL 9010	0.6 bar	90 °C	013G5002
	M30 x 1.5	White, RAL 9010	0.6 bar	90 °C	013G5003
	Danfoss RTD	White, RAL 9010	0.6 bar	90 °C	013L5002
	Danfoss RA 2000	Chrome	0.6 bar	90 °C	
	M30 x 1.5	Chrome	0.6 bar	90 °C	
	Danfoss RTD	Chrome	0.6 bar	90 °C	
Manual shut off knob for high pressure valves	Danfoss RA 2000	Brass	10 bar	120 °C	013G3300
Manual shut off knob for high pressure valves	Danfoss RTD	Brass	10 bar	120 °C	013G3305

Note!

Manual setting knobs offer no frost protection to the radiator. In order to control room temperature a radiator thermostat is required.

Mounting

The knob snaps onto the valve eliminating the need for any mounting tool.

A 2 mm hexagonal screw ensures a stable attachment.
