# Installation guide Solenoid coil for control in potentially explosive areas Type 018F47xx series

Danfoss

Danfoss

# ENGLISH

# Identification

- 0 Green/Yellow cord for earthing
- ② Week and date of manufacturing
- ③ External earth terminal
- ④ Code number
- ⑤ Voltage
- 6 Frequency
- ⑦ Current
- 8 Ambient temperature range
- Ountry of manufacturing
  Ountry of manufacturin
- IP degree
- ① Approval/Certificate number

# **Description and approval**

Solenoid valve for control in potentially explosive area.

#### Approval

EMC 2004/108/EF ROHs 2002/95/EC

ATEX 2014/34/EU Ex mb IIC T4 Gb DEMKO 14 ATEX 1314X IECEx ULD 14.0001X

# The coil may only be installed with following valve combinations

 EVM NC and EVM NO • EVR NC 2-40 EV210B FVR NO 2-40 EV220B • EVRH NC 10-40 EV250B • EVRH NO 10-40 EV251B EVRA(T) 3-40 FV222B EVRS(T) 3-20 • EV224B EVRF-EVRP-EVRB • EV227B GPLX **Application and specification**

### **Safety instruction**

All national safety regulations must be complied with in connection with installation, start-up and operation of Danfoss solenoid valve. Furthermore, the requirements of the declaration of conformity and national regulations for installation in explosion area. Disregarding such regulations involves a risk of serious personal injury or extensive material damage. Work in connection with the solenoid valve mentioned must be performed only by suitable qualified persons.

Basic safety and health requirements are fulfilled through compliance with:

- IEC60079-0, 6th Edition
- EN 60079-0: 2012 + A11: 2013
- IEC60079-18, 3rd Edition, EN60079-18: 2009

#### Installation, operation and maintenance

- Protect the coil against external impact.
- Protect the coil against direct sunlight and other ultraviolet sources.
- Disconnect the power before dismounting the coil.
- Always install a fuse in front of the coil. DIN 41571-2 Rated breaking capacity 1500 A Medium Time lag

Minimum voltage 250 V for a.c. and 24 V for d.c.

- Install the coil and cable according to EN60079-14.
- The cable supplied with the solenoids must not be handled or flexed, and shall be protected against impact if the ambient temperature is below 0 °C.
- Installation and handling of the cable shall be done at temperature above 0 °C.
- The cable is only for fixed installation and the minimum bending diameter for fixed installation: r ≥ 55mm ().

- The cable jacket material is PVC.
- The cable operating temperature range is -40 °C to + 90 °C.
- The product is provided with a yellow/green PE wire as well as an external earth terminal. These shall not be used simultaneously.

If the external earth connection is connected to earth or bonding system, the Y/G earth wire must be cut off, isolated and not connected. If the Y/G wire is connected to earth, the external earth terminal must be left without any connection. For the external earth terminal the size of the earth core shall be minimum 4mm<sup>2</sup> and the installer shall use a suitable method e.g. crimp terminal to ensure secureness of the external earth connection. The screw for external PE shall be mounted with 1.2Nm ±0.2.The external earth conductors shall be physically secured close to the coil connection to ensure that the conductors cannot be readily loosened or twisted.

- The end user must ensure the earthing of the coil is maintained.
- Non-detachable cords method Z repairing not allowed. If the coil failed, it must be replaced by a new coil.

In case of problems please contact: Danfoss A/S DK-6430 Nordborg Denmark
