

## 2/2-way Solenoid Valve for combustible gases, 0–150mbar

Type 0293 can be combined with...

### Type 2508

Cable plug

Type 293 switches without pressure change from zero bar. The direct acting solenoid feed valve is delivered with circuit function A. It is normally closed. Upon switching the magnetic core is tightened against the spring and the valve opens. A filter is built-in to the inlet. The valve is especially good for switching low-pressure combustible gases.

Servo-assisted 2/2-way valve, direct acting, normally closed

- Direct acting (normally closed) Solenoid Valve
- Vibration resistant screw block coil construction
- Seal and diaphragm according to DIN EN 549
- Integrated filter
