

AirLINE and AirLINE Quick – electrical/pneumatic Automation System

Type 8644 can be combined with...

- Fully compatible with PHOENIX INLINE System
- Combination of Fieldbus, pilot valves and I/O modules
- higher flexibility in the control cabinet with AirLINE Quick
- Compact design
- High flow rate value

Type 8032
Switch

Type 6212
Solenoid valve

Type 2012
Process valve

Type 8630
Valve controller

Type 0498
Double pilot controlled check valve

The AirLINE System integrates high performance solenoid pilot valves, remote electronic I/O and fieldbus communication into a process actuation and control system that is both compact and extremely flexible. Its modular design allows fully customized, pre-mounted and tested

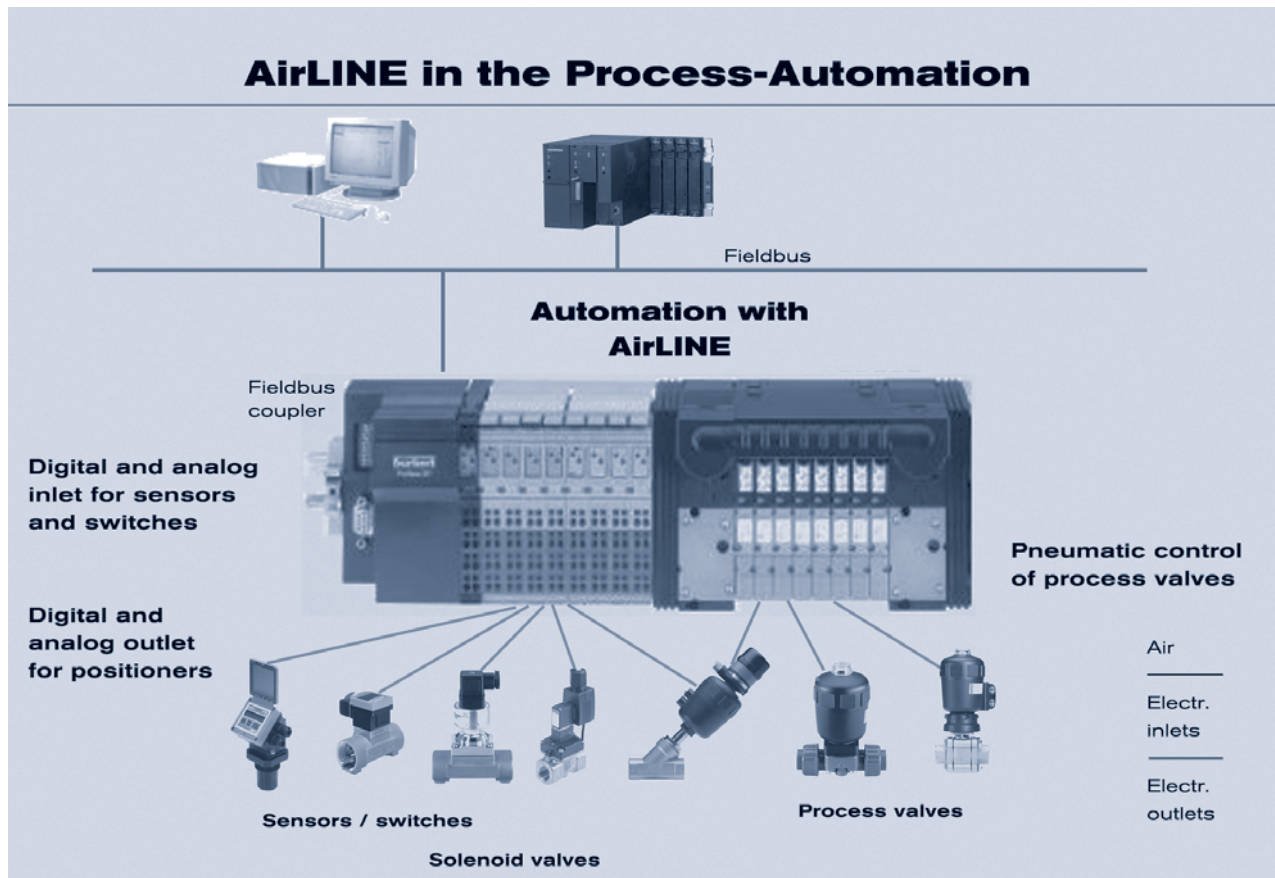

solutions to exactly meet all application needs including the integration of a local Mini PLC. Due to the full electronic and mechanical integration, the valve block can be added without the need of any tools or wiring.

11 mm width/station Solenoid Valves 6524 and 6525

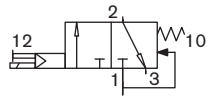

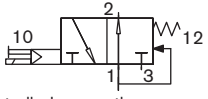

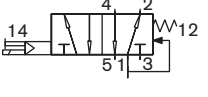

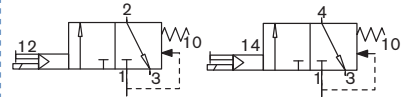

The solenoid valve Types 6524 and 6525 consist of a 6144 flipper pilot valve and a pneumatic seat valve. The principle allows switching of high pressures together with low power consumption and fast response times. The pilot valves are equipped with manual override as a standard.

Specification	3/2-way valve	2 x 3/2-way valve
Body material	PA (Polyamide)	
seal materials	FPM, NBR and PUR	
Medium	lubricated and non lubricated dry compressed air; neutral gases (5 µm-Filter)	
Port connections	Flange for MP11	
Pneumatic module	Type MP11 with push-in connection Diameter 6 mm, D1/4, threaded port M7	
Manual override	Standard	
Operating voltage	24 V DC *	
Nominal power	0,8 W	2 x 0.8 W with reduction of power electronics
Duty cycle	Continuous operation (100% ED)	
Electr. connection on valve	Rectangular plug 2-pin grid spacing 5,08 mm	Rectangular plug 3-pin grid spacing 2,54 mm
Mounting	with 2 screws M2 x 20	with 2 screws M2 x 28
Installation	As required, preferably with actuator upright	
Flow rate: QNn value air [l/min]:	Measured at +20°C, 6 bar pressure at valve inlet and 1 bar pressure difference	
Pressure values [bar]:	Overpressure with respect to atmospheric pressure	
Response times [ms]:	Measured according to ISO 12238	

* 10% residual ripple allowed

11 mm width/station: pilot valve Type 0460

The solenoid valve Type 0460 consists of a pneumatic valve body fitted with a double coil pilot valve. The principle allows switching of high pressures together with low power consumption and fast response times. All valves are equipped with manual override as a standard.

Technical data	
Body material	Aluminium
Seal material	NBR
Medium	lubricated and non lubricated dry compressed air; Neutral gases (5µm filter recommended)
Port connections	Flange
Pneumatic module	MP11
Supply port connection 1 (P), 3 (R), 5 (S)	G 1/4 1/4 Push-in connection Ø 10 mm
Service port 2 (A), 4 (B)	Push-in connection Ø 6 mm push-in connection Ø 1/4" threaded port M7
Operating voltage	24 V/DC
Electrical connection at the valve	Rectangular plug
Manual override	standard
Flow rate: QNn value air [l/min]	Measured at +20°C, 6 bar pressure at valve inlet and 1 bar pressure difference
Pressure values [bar]	Measured as overpressure to the atmospheric pressure
Response times [ms]	Measured according to ISO 12238

16,5mm width/station Solenoid Valves 6526 and 6527

The solenoid valve Types 6526 and 6527 consist of a pneumatic valve body fitted with Type 6106 rocker pilot valve. The principle allows switching of high pressures together with low power consumption and fast response times. The pilot valves are equipped with manual override as a standard.

Specification	
Body material	PA (Polyamide)
seal materials	NBR
Medium	lubricated and non lubricated dry compressed air; neutral gases (10 µm filter)
Port connections	Flange for MP12
Pneumatic module	Type MP12 with G 1/8, Push-in connection Ø 8 mm NPT 1/8
Manual override	Standard
Operating voltage	24 V DC
Nominal power	2 W, 1W
Duty cycle	Continuous operation 100%
Electr. connection on valve	Tag connector acc. to DIN EN 175301-803 (previously DIN 43650) Form C
Mounting	with 2 screws M3 x 30
Installation	As required, preferably with actuator upright
Flow rate: QNn value air [l/min]:	Measured as overpressure to the atmospheric pressure 1 bar pressure difference
Pressure values [bar]	Measured as overpressure to the atmospheric pressure
Response times [ms]	Measured according to ISO 12238

¹⁾ Version with auxiliary pilot air

²⁾ Electric connection with manual override.

³⁾ Closing time approx. 5 ms higher when used together with valve unit

16,5 mm width/station: pilot valve Type 0461

The solenoid valve Type 0461 consists of a pneumatic valve body fitted with a double coil pilot valve. The principle allows switching of high pressures together with low power consumption and fast response times. All valves are equipped with manual override as a standard.

Technical data	
Body material	Aluminium
Seal material	NBR
Medium	lubricated and non lubricated dry compressed air; Neutral gases (10µm filter recommended)
Port connections	Flange
Pneumatic module	MP12
Supply port connection 1 (P), 3 (R), 5 (S)	G 3/8 NPT 3/8
Service port 2 (A), 4 (B)	G 1/8 NPT 1/8 Push-in connection Ø 8 mm
Operating voltage	24 V/DC
Electrical connection at the valve	Rectangular plug
Manual override	standard
Flow rate: QNn value air [l/min]	Measured at +20°C, 6 bar pressure at valve inlet and 1 bar pressure difference
Pressure values [bar]	Measured as overpressure to the atmospheric pressure
Response times [ms]	Measured according to ISO 12238

AirLINE Quick

With AirLINE Quick you can reduce the amount of the components in the control cabinet considerably. With the AirLINE Quick Adapter the valve island is directly adapted on the control cabinet floor or wall.

* The valves of Type 0460 can not be installed with AirLINE Quick because of their size.
