

## AirLINE and AirLINE Quick – electrical/pneumatic Automation System – WAGO

Remote I/O and Fieldbus modules

- Fully compatible with WAGO I/O System 750
- Combination of Fieldbus, pilot valves and I/O modules
- higher flexibility in the control cabinet with AirLINE Quick
- Compact design
- High flow rate value

Type 8644 can be combined with...

**Type 8032**  
Switch

**Type 6212**  
Solenoid valve

**Type 2012**  
Process valve

**Type 8630**  
Valve controller

**Type 1062**  
Position feedback

The AirLINE System integrates high performance solenoid pilot valves, remote electronic I/O and fieldbus communication into a process actuation and control system that is both compact and extremely flexible. Its modular design allows fully customized, pre-mounted and tested

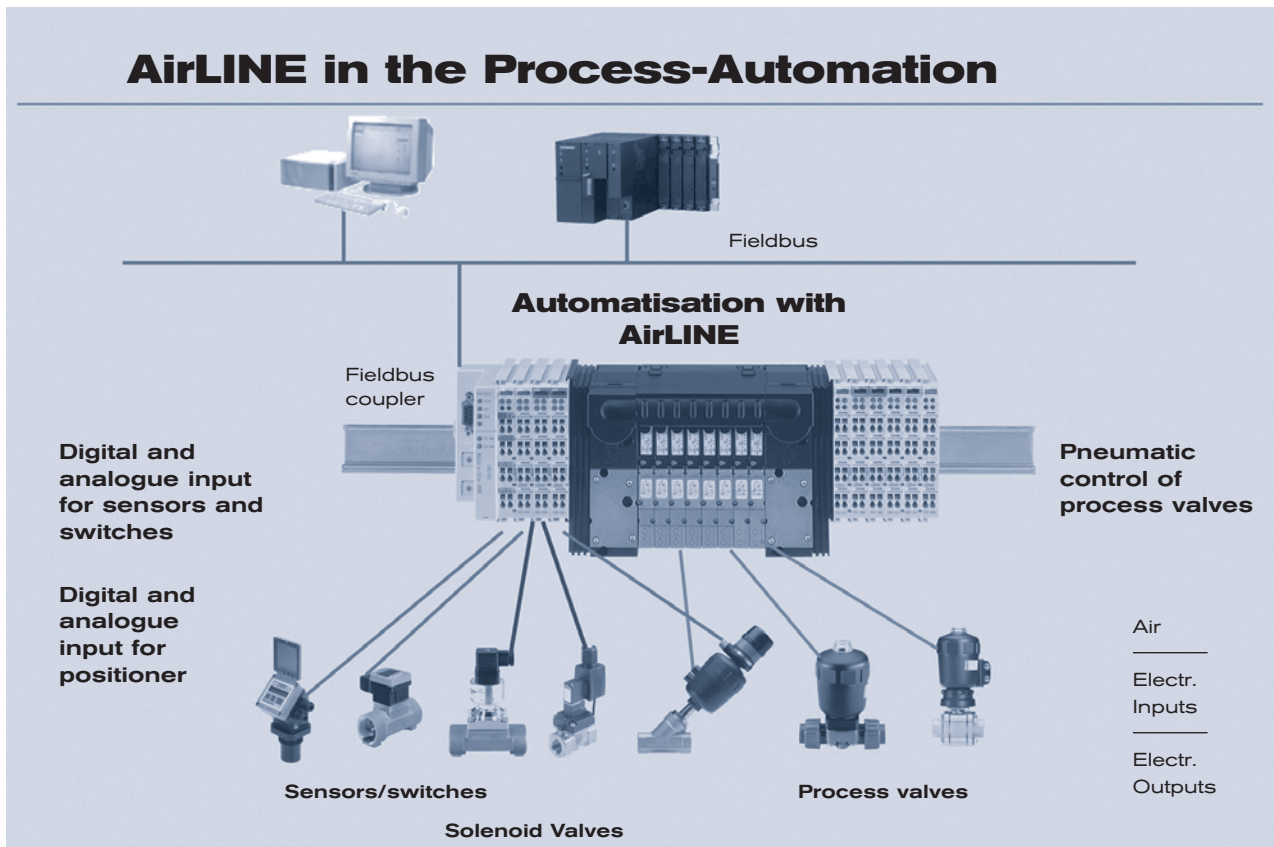

solutions to exactly meet all application needs including the integration of a local Mini PLC. Due to the full electronic and mechanical integration, the valve block can be added without the need of any tools or wiring.

### Application example

11 mm width/station Solenoid Valves 6524 and 6525

The solenoid valve Types 6524 and 6525 consist of a pneumatic valve body fitted with Type 6104 rocker pilot valve. The principle allows switching of high pressures together with low power consumption and fast response times. The pilot valves are equipped with manual override as a standard.

Specification	3/2-way valve	2 x 3/2-way valve
<b>Body material</b>	PA (Polyamide)	
<b>seal materials</b>	FPM, NBR and PUR	
<b>Medium</b>	lubricated and non lubricated dry compressed air; neutral gases (5 µm-Filter)	
<b>Port connections</b>	Flange for MP11	
<b>Pneumatic module</b>	Type MP11 with push-in connection Diameter 6 mm, D1/4 Threaded port M7	
<b>Manual override</b>	Standard	
<b>Operating voltage</b>	24 V DC	
<b>Nominal power</b>	0.8 W	2 x 0.8 W with reduction of power consumption
<b>Duty cycle</b>	Continuous operation (100% ED)	
<b>Electr. connection on valve</b>	Rectangular plug 2-pin grid spacing 5.08 mm	Rectangular plug 3-pin grid spacing 2.54 mm
<b>Mounting</b>	with 2 screws M2 x 20	with 2 screws M2 x 28
<b>Installation</b>	As required, preferably with actuator upright	
<b>Flow rate: QNn value air [l/min]</b>	Measured at +20°C, 6 bar pressure at valve inlet and 1 bar pressure difference	
<b>Pressure values [bar]:</b>	Overpressure with respect to atmospheric pressure	
<b>Response times [ms]:</b>	Measured according to ISO 12238

<sup>2)</sup> Version with integrated reduction of power consumption

\* 10% residual ripple allowed

11 mm width/station: pilot valve Type 0460

The solenoid valve Type 0460 consists of a pneumatic valve body fitted with a double coil pilot valve. The principle allows switching of high pressures together with low power consumption and fast response times. All valves are equipped with manual override as a standard.

Technical data	
Body material	Aluminium
Seal material	NBR
Medium	lubricated and non lubricated dry compressed air; Neutral gases (5µm filter recommended)
Port connections	Flange
Pneumatic module	MP11
Supply port connection 1 (P), 3 (R), 5 (S)	G 1/4 NPT 1/4 Push-in Ø 10 mm
Service port 2 (A), 4 (B)	Push-in Ø 6 mm Push-in Ø 1/4" Threaded port M7
Operating voltage	24 V/DC
Electrical connection at the valve	Rectangular plug
Manual override	standard
Flow rate: QNn value air [l/min]	Measured at +20°C, 6 bar pressure at valve inlet and 1 bar pressure difference
Pressure values [bar]	Measured as overpressure to the atmospheric pressure
Response times [ms]	Measured according to ISO 12238

16,5mm width/station Solenoid Valves 6526 and 6527

The solenoid valve Types 6526 and 6527 consist of a pneumatic valve body fitted with Type 6106 rocker pilot valve. The principle allows switching of high pressures together with low power consumption and fast response times. The pilot valves are equipped with manual override as a standard.

Specification	
Body material	PA (Polyamide)
seal materials	NBR
Medium	lubricated and non lubricated dry compressed air; neutral gases (10 µm filter)
Port connections	Flange for MP12
Pneumatic module	Type MP12 with G 1/8, Push-in Ø 8 mm NPT 1/8
Manual override	Standard
Operating voltage	24 V DC
Nominal power	2 W, 1W
Duty cycle	Continuous operation 100%
Electr. connection on valve	Tag connector acc. to DIN EN 175301-803 (previously DIN 43650) Form C
Mounting	with 2 screws M3 x 30
Installation	As required, preferably with actuator upright

**AirLINE Quick**

With AirLINE Quick you can reduce the amount of the components in the control cabinet considerably. With the AirLINE Quick Adapter the valve island is directly adapted on the control cabinet floor or wall.

\* The valves of Type 0460 can not be installed with AirLINE Quick because of their size.
