## Kelvion

## EXPERTS IN HEAT EXCHANGE -SINCE 1920

Welcome to Kelvion! Where Heat Exchange is our Business. We are one of the leading global manufacturers of heat exchangers and have been providing solutions for almost every industrial application imaginable since the 1920s, specializing in customized solutions suitable for extreme environmental conditions - as of 2015 under the name of Kelvion.

With one of the most extensive selections of heat exchangers in the world, we are a well-known partner in many industries, including transportation, energy, oil and gas, the heavy industry, chemical and marine as well as sugar, food and beverage and the HVAC and refrigeration technology sector. Our products include Compact Fin Heat Exchangers, Plate Heat Exchangers, Single Tube Heat Exchangers, Transformer Cooling Systems, Cooling Towers and Shell & Tube Heat Exchangers. Our many years of experience and in-depth expertise have made us specialists in this field. Our heat exchangers are designed specifically to meet the needs of the respective machine or equipment system, ensuring outstanding energy efficiency and reliability in any market segment. This gives our customers a cutting-edge over their competitors while also reducing operating costs over the long term.

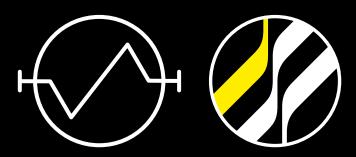

As your heat exchange partner, we understand that outstanding and reliable after-sales services are critical for you, our customer, and we work alongside with you in close partnership supporting you throughout the full life cycle of your plant and equipment to ensure lasting business success.

Kelvion – Experts in Heat Exchange.

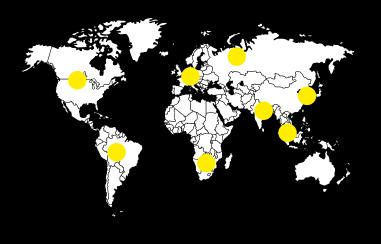

#### **KELVION – A TRIBUTE TO LORD KELVIN** (1824 - 1907)

Lord Kelvin formulated the laws of thermodynamics and absolute units of temperature are stated in kelvin, in his honor.

| CX60 | CO <sub>2</sub>   60 bar |

# APPLICATION BENEFITS FOR CONTRACTORS AND OPERATORS

#### Applications

- Cooling of bottles
- Storage of fast and frozen food
- Cooling of packaged and open products

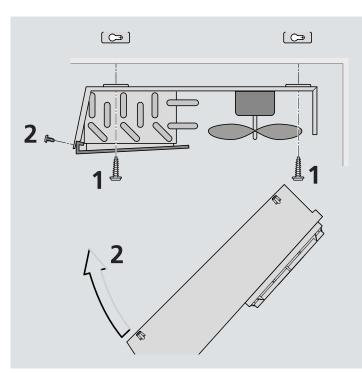

#### THE SMART WAY OF SAVING ENERGY.

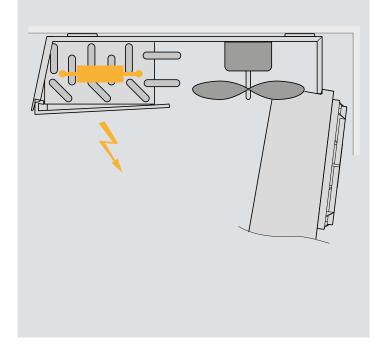

No more filling up: Gas stations have long since turned into well sorted convenience stores with fresh food, open 24/7.

Takeaway operators and kiosk owners are reporting a rising demand for beverages and food. This is why they are constantly increasing their stockpiling. This requires short-term storage of prepared food by qualified professionals – Conventional refrigerators or freezers cannot meet those requirements as regards both refrigeration and energy technology. Beverages, dairy products and packaged food have varying requirements – in terms of storage temperature. Only in small cold rooms it is economically feasible to hygienically store fresh produce.

The Kelvion KCB/KCC is the 1st choice for keeping salad, fruit, vegetable, meat and sausages fresh in kitchens, canteens and the retail trade. Its all surface, hygienic powder coated parts are primarily designed for areas with exacting hygiene requirements.

The Kelvion KCB/KCC is a star in small cold rooms – for cooling packaged as well unpacked chilled goods.

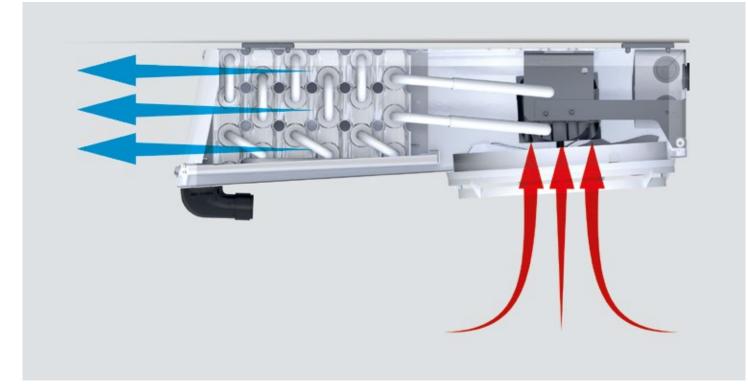

#### **RELIABLE REFRIGERATION**

The compact Kelvion KCB/ KCC is primarily designed for ensuring the quality cooling of foodstuffs:

- Drip trays can be specified with horizontal or vertical drain.
- High-grade powder coated aluminum caseworks offer best corrosion protection.
  - An integrated air baffle plate ensures optimal airflow.
- Drip trays can be swung down to give access to the bottom for cleaning or maintenance.
- With its low silhouette and the horizontal condensate drain you get the most out of your cold room space.

Although small in size, is not the unit cooler is capable of a lot more: It maintains the required cold room temperature by its optimal distribution of cold air. Heat pockets are eliminated to retain the quality and freshness of the goods for as long as possible.

Large cooling surfaces and short defrosting times offer maximum cooling quality. If the units are used in deepfreeze rooms with adjacent kitchen or if the traffic in and out of the deep-freezer is high, additional electrical defrosting is recommended.

# **BASIC VERSION**

#### CASING

- ► Aluminum, Sendzimir zinc-plated steel
- Best quality powder coated edges thanks to high-grade powder coating, RAL 9010 pure white
- Food-safe
- Smooth surfaces: Easy to clean
- ► Hinged drip tray, removable
- Drip tray: additional integrated splash pan Height only 180 mm (incl. 90° drain)

#### **ELECTRIC DEFROST**

- Tubular heater: Stainless steel
- Connections: steam-proof
- Mains voltage: 1/N/PE 230V 50/60Hz
- Readily wired for connection box
- Optimized tubular heater configurations ensure fast and even defrosting
- Aluminum tube sleeves: Ensure excellent heat transfer to the fins and thus effective defrosting cycles with optimized service life

#### **HEAT EXCHANGER**

- ▶ Tube: Copper, inner finned, Ø 10 mm (1-2 fans) & Ø 12 mm (3 fans)
- ► Fins: Aluminum HFE<sup>®</sup> fins
- End plates: Aluminum
- Staggered tube system
- Fin spacing: A = 4,5 mm
  - B = 7 mm
- ▶ Fins flared to form-fit the core tube
- Highly effective heat transfer and compact design
- Internal cleanliness according to DIN 14276
- Connection Inlet: Copper pipe for solder connection, sealed
- Connection Outlet: Copper pipe for solder connection, sealed
- Completely powder-coated (hygienic paint), RAL 9010 pure white

#### **FAN UNIT**

- ► EC technology
- Blow-through axial fan
- ► Fan diameter: 200 mm
- ▶ Available ambient temperatures: -40° C up to +50° C
- Supply voltage: 1/N/PE 230V 50/60Hz
- Motor protection: via engine electronics
- Fans are wired to an internal distribution box
- ► Electronic motor protection
- ▶ Protection: IP54
- Protection class: II
- ▶ Isolation class: I.Cl.H
- ► Fans are wired to one internal distribution box

| ► | Motor Control:      |  |
