

# Resistance thermometer For additional thermowell Model TR10-B

WIKA data sheet TE 60.02

for further approvals  
see page 15

## Applications

- Machine building, plant and vessel construction
- Energy and power plant technology
- Chemical industry
- Food and beverage industry
- Sanitary, heating and air-conditioning technology

## Special features

- Sensor ranges from -196 ... +600 °C [-320 ... +1,112 °F]
- For mounting in all standard thermowell designs
- Spring-loaded measuring insert (replaceable)
- Pt100 or Pt1000 sensors
- Explosion-protected versions are available for many approval types (see page 2)

## Description

Resistance thermometers in this series can be combined with a large number of thermowell designs. Operation without thermowell is only recommended in certain applications.

A wide variety of possible combinations of Pt100 or Pt1000 sensor, connection head, insertion length, neck length, connection to thermowell etc. are available for the thermometers; suitable for any thermowell dimension and any application.

A large number of different explosion-protected approvals are available for the TR10-B.

Optionally we can fit analogue or digital transmitters from the WIKA range into the connection head of the TR10-B.

- ④ Measuring insert (TR10-A)
- ⑤ Terminal block/transmitter (option)
- ⑥ Transmitter (option)

## Overview of approvals for explosion protection

Approval	Explosion protection				
	Ex i (gas) Zone 0, 1, 2	Ex i (dust) Zone 20, 21, 22	Ex e (gas) Zone 1, 2	Ex t (dust) Zone 21, 22	Ex nA (gas) Zone 2
<b>ATEX</b>	x	x	x	x	x
<b>IECEX</b>	x	x	x	x	x
<b>EAC</b>	x	x	-	-	x
<b>Ex Ukraine</b>	x	x	-	-	-
<b>INMETRO</b>	x	x	-	-	-
<b>CCC</b>	x	x	x	-	x
<b>KCs</b>	x	-	-	-	-
<b>PESO</b>	x	-	-	-	-

→ For detailed information, see page 15

# Measuring element

Measuring element		
Type of measuring element	Pt100, Pt1000 <sup>1)</sup>	
Measuring current	0.1 ... 1.0 mA	
Connection method		
Single elements	1 x 2-wire	 red white
	1 x 3-wire	 red red white
	1 x 4-wire	 red red white white
Dual elements	2 x 2-wire	 red white black yellow
	2 x 3-wire	 red red white black black yellow
	2 x 4-wire <sup>2)</sup>	 red red white white black black yellow yellow
Validity limits of the class accuracy in accordance with EN 60751		
Class B	Wire-wound	■ -196 ... +600 °C ■ -196 ... +450 °C
	Thin-film	■ -50 ... +500 °C ■ -50 ... +250 °C
Class A <sup>3)</sup>	Wire-wound	-100 ... +450 °C
	Thin-film	-30 ... +300 °C
Class AA <sup>3)</sup>	Wire-wound	-50 ... +250 °C
	Thin-film	0 ... 150 °C

1) Pt1000 only available as a thin-film measuring resistor

2) Not for 3 mm diameter

3) Not with 2-wire connection method

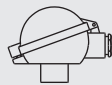

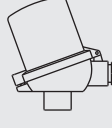

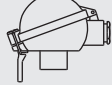

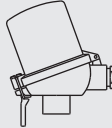

→ For detailed specifications for Pt100 sensors, see Technical information IN 00.17 at [www.wika.com](http://www.wika.com).

The table shows the temperature ranges listed in the respective standards, in which the tolerance values (class accuracies) are valid.

- The combinations of a 2-wire connection with class A or class AA are not permissible, since the lead resistance of the MI cable and the connection lead negates the higher sensor accuracy.
- When using a 3-wire connection, we recommend not to exceed a probe length, including the connection cable, of approx. 30 m.
- Longer probe/cable lengths should be designed with a 4-wire connection.

## Connection head

### ■ European designs per EN 50446 / DIN 43735

Model	Material	Cable entry thread size	Ingress protection (max.) <sup>1)</sup> IEC/EN 60529	Cap	Surface	Connection to neck tube

3) Not available for ½ NPT thread size cable entry

4) With appropriate mating connector connected

5) Suitable cable gland required for operation

# Measuring insert

Measuring insert		
<b>Versions</b>	Vibration-resistant, sheathed measuring cable (MI cable)	
Standard	Standard soldering lugs	
Option	Recessed soldering lugs	
<b>Optimal heat transfer</b>	Requirement <ul style="list-style-type: none"> <li>■ Correct measuring insert length</li> <li>■ Correct measuring insert diameter</li> </ul>	
	Bore diameter of the thermowell	Max. 1 mm larger than measuring insert diameter
	Joint width	For joint width > 0.5 mm between thermowell and measuring insert: → Negative impact on heat transfer → Unfavourable response behaviour of the thermometer
<b>Insertion length</b>	When fitting the measuring insert into a thermowell, it is very important to determine the correct insertion length (= thermowell length for bottom thicknesses of ≤ 5.5 mm). In order to ensure that the measuring insert is firmly pressed down onto the bottom of the thermowell, the insert must be spring-loaded (spring travel: max. 10 mm).	
<b>Spring travel</b>	max. 10 mm	

Measuring insert diameter $\phi d$ in mm	Index per DIN 43735	Tolerance in mm	Sheath material	
			Standard design	Recessed soldering lugs
3	Standard	30	<ul style="list-style-type: none"> <li>■ 1.4571</li> <li>■ 316L</li> </ul>	1.4571

## Transmitter

Transmitter models	Model T15	Model T32
Transmitter data sheet	TE 15.01	TE 32.04
Figure		
<b>Output</b>		
4 ... 20 mA	x	x
HART® protocol	-	x
<b>Connection method</b>	<ul style="list-style-type: none"> <li>■ 1 x 2-wire</li> <li>■ 1 x 3-wire</li> <li>■ 1 x 4-wire</li> </ul>	<ul style="list-style-type: none"> <li>■ 1 x 2-wire</li> <li>■ 1 x 3-wire</li> <li>■ 1 x 4-wire</li> <li>■ 2 x 2-wire</li> </ul>
<b>Measuring current</b>	< 0.2 mA	< 0.3 mA
<b>Explosion protection</b>	Option	Option
<b>Mounting types</b>		
Mounting onto the measuring insert	With mounting on the measuring insert, the transmitter replaces the terminal block and is fixed directly to the terminal plate of the measuring insert.	
Mounted within the cover of the connection head	Mounting the transmitter in the cover of the connection head is preferable to mounting it on the measuring insert. With this type of mounting, for one, a better thermal insulation is ensured, and in addition, exchange and mounting for servicing is simplified.	

## Mounting types

Mounting onto the measuring insert

Measuring insert with mounted transmitter (here: Model T32)

Measuring insert prepared for transmitter mounting

Mounted within the cover of the connection head

Possible mounting positions for transmitters	Model T15	Model T32

KN4-A	○	○
KN4-P	○	○
1/4000	○	○
7/8000	○	○
7/8000 / DIH50	○	○

Legend:

- Mounted instead of terminal block
- Mounted within the cover of the connection head
- Mounting not possible

The mounting of a transmitter on the measuring insert is possible with all the connection heads listed here. The fitting of a transmitter in the (screw) cap of a North American design connection head is not possible.

Mounting of 2 transmitters on request.

For a correct determination of the overall measuring deviation, the sensor and transmitter measuring deviations must be added.

### Functional safety with model T32 temperature transmitter (option)

In safety-critical applications, the entire measuring chain must be taken into consideration in terms of the safety parameters. The SIL classification allows the assessment of the risk reduction achieved by the safety installations.

Selected TR10-B resistance thermometers, in combination with a suitable temperature transmitter (e.g. model T32.1S, TÜV certified SIL version for protection systems developed in accordance with IEC 61508), are suitable as sensors for safety functions to SIL 2.

→ For detailed specifications, see Technical information IN 00.19 at [www.wika.com](http://www.wika.com).

## Neck tube

### Versions

Neck tube design	Diameter	Connection to head	Connection to thermowell	Material
Neck tube per DIN 43772	<ul style="list-style-type: none"> <li>■ 12 x 1.5 mm</li> <li>■ 12 x 2.5 mm</li> </ul>	M24 x 1.5 (rotatable threaded connection)	<ul style="list-style-type: none"> <li>■ Mounting thread</li> <li>■ Compression fitting</li> <li>■ Union nut</li> <li>■ Pressure screw</li> <li>■ Without threaded connection, plain</li> </ul>	1.4571

	~ 27 mm	¾ NPT	Mounting thread	316

### Thread sizes

Neck tube design	Diameter	Thread to the thermowell
Neck tube per DIN 43772	<ul style="list-style-type: none"> <li>■ 12 x 1.5 mm</li> <li>■ 12 x 2.5 mm</li> </ul>	<ul style="list-style-type: none"> <li>■ G ½ B</li> <li>■ G ¾ B</li> <li>■ G ¼ B</li> <li>■ M20 x 1.5</li> <li>■ M18 x 1.5</li> <li>■ M14 x 1.5</li> <li>■ ½ NPT</li> <li>■ ¾ NPT</li> <li>■ G ½ B compression fitting (metal ferrule)</li> <li>■ G ¾ B compression fitting (metal ferrule)</li> <li>■ M18 x 1.5 compression fitting (metal ferrule)</li> <li>■ M20 x 1.5 compression fitting (metal ferrule)</li> <li>■ G ½ B union nut</li> <li>■ G ¾ B union nut</li> <li>■ M20 x 1.5 union nut</li> <li>■ G ½ B pressure screw</li> <li>■ G ¾ B pressure screw</li> <li>■ M20 x 1.5 pressure screw</li> <li>■ Without threaded connection, plain</li> </ul>
Neck tube per DIN 43772	14 x 2.5 mm	<ul style="list-style-type: none"> <li>■ G ½ B</li> <li>■ G ¾ B</li> <li>■ G ¼ B</li> <li>■ M20 x 1.5</li> <li>■ M18 x 1.5</li> <li>■ M14 x 1.5</li> <li>■ ½ NPT</li> <li>■ ¾ NPT</li> <li>■ G ½ B union nut</li> <li>■ G ¾ B union nut</li> <li>■ M20 x 1.5 union nut</li> <li>■ G ½ B pressure screw</li> <li>■ G ¾ B pressure screw</li> <li>■ M20 x 1.5 pressure screw</li> </ul>

Neck tube design	Diameter	Thread to the thermowell
Neck tube with counter nut to head	14 x 2.5 mm	<ul style="list-style-type: none"> <li>■ 1/2 NPT</li> <li>■ 3/4 NPT</li> <li>■ G 1/2 B</li> <li>■ G 3/4 B</li> <li>■ G 1/4 B</li> <li>■ M14 x 1.5</li> <li>■ M18 x 1.5</li> <li>■ M20 x 1.5</li> </ul>
Double threaded hex bushing (with hexagonal spanner flats)	-	<ul style="list-style-type: none"> <li>■ G 1/2 B</li> <li>■ G 3/4 B</li> <li>■ G 1/4 B</li> <li>■ 1/2 NPT</li> <li>■ 3/4 NPT</li> <li>■ M14 x 1.5</li> <li>■ M18 x 1.5</li> <li>■ M20 x 1.5</li> </ul>
"Nipple-union-nipple" neck tube	~ 22 mm	1/2 NPT
	~ 27 mm	3/4 NPT
Double threaded hex bushing (tube section)	~ 22 mm	1/2 NPT
	~ 27 mm	3/4 NPT

### Neck lengths

Neck tube design	Neck length	Min. / Max. neck length
Neck tube per DIN 43772	150 mm [approx. 6 in]	30 mm [approx. 1.2 in] / 500 mm [approx. 20 in]
Neck tube per DIN 43772, plain	150 mm [approx. 6 in]	75 mm [approx. 3 in] / 900 mm [approx. 35 in]
Neck tube with counter nut to head	150 mm [approx. 6 in]	75 mm [approx. 3 in] / 250 mm [approx. 10 in]
<b>Double threaded hex bushing (with hexagonal spanner flats)</b>		
M24 x 1.5 to connection head, parallel thread to thermowell	13 mm	-
1/2 NPT to connection head, parallel thread to thermowell	25 mm	-
M24 x 1.5 to connection head, tapered thread to thermowell	25 mm	-
1/2 NPT to connection head, tapered thread to thermowell	25 mm	-
"Nipple-union-nipple" neck tube	150 mm [approx. 6 in]	75 mm [approx. 3 in] / 250 mm [approx. 10 in]
Double threaded hex bushing (tube section)	50 mm [approx. 2 in]	50 mm [approx. 2 in] / 250 mm [approx. 10 in]

The neck tube is screwed into the connection head. The neck length depends on the intended use. Usually an isolation is bridged by the neck tube. Also, in many cases, the neck tube serves as a cooling extension between the connection head and the medium, in order to protect a possible built-in transmitter from high medium temperatures.

Other versions on request

## Operating conditions

Operating conditions	
Ambient and storage temperature	-60 <sup>1)</sup> / -40 ... +80 °C
Vibration resistance	The information on vibration resistance refers to the tip of the measuring insert. → For detailed specifications on the vibration resistance of Pt100 sensors, see Technical information IN 00.17 at <a href="http://www.wika.de">www.wika.de</a> .
Standard	6 g peak-to-peak, wire-wound measuring resistor or thin film
Option	<ul style="list-style-type: none"> <li>■ Vibration-resistant probe tip, max. 20 g peak-to-peak, thin-film measuring resistor</li> <li>■ Highly vibration-resistant probe tip, max. 50 g peak-to-peak, thin-film measuring resistor</li> </ul>

### IP ingress protection per IEC/EN 60529

First index number	Degree of protection / Short description	Test parameters
<b>Degrees of protection against solid foreign bodies (defined by the 1st index number)</b>		
5	Dust-protected	Per IEC/EN 60529
6	Dust-tight	Per IEC/EN 60529
<b>Degrees of protection against water (defined by the 2nd index number)</b>		
4	Protected against splash water	Per IEC/EN 60529
5	Protected against water jets	Per IEC/EN 60529
6	Protected against strong water jets	Per IEC/EN 60529
7 <sup>2)</sup>	Protected against the effects of temporary immersion in water	Per IEC/EN 60529
8 <sup>2)</sup>	Protected against the effects of permanent immersion in water	As agreed upon

1) Special version on request (explosion-protected versions only available with specific approvals)

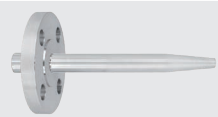

2) Ingress protections, describing temporary or permanent immersion, on request

Standard ingress protection of model TR10-B is IP65.

The specified degrees of protection apply under the following conditions:

- Use of a suitable thermowell  
(without suitable thermowell: IP40)
- Use of a suitable cable gland
- Use of a cable cross-section appropriate for the gland or select the appropriate cable gland for the available cable
- Adhere to the tightening torques for all threaded connections

## Thermowell (option)

Thermowell selection

	<b>DNV GL</b> Type approval for the shipbuilding industry - Maximum insertion length $l_1$ : 435 mm - Connection head: Model BSZ - Neck tube: $\varnothing 11 \times 2$ mm or $\varnothing 12 \times 2.5$ mm, max. 150 mm long - Measuring insert: $\varnothing 6$ mm - Optional with TW10-P (data sheets TW 95.10, TW 95.12)  <i>Location classification:</i> <i>Temperature D (ambient temperature: -25 ... +70 °C)</i> <i>Humidity B (relative humidity: up to 100 %)</i> <i>Vibration B (frequency: 3 ... 25 Hz; amplitude: 1.6 mm peak; frequency: 25 ... 100 Hz; amplitude: 4 g)</i> <i>EMC Not relevant</i> <i>Case Required protection according to DNV rules shall be provided upon installation on board. For use on open deck a connection head IP68 is required.<sup>4)</sup> (for "open deck")</i>	International

- 1) Only for built-in transmitter
- 2) Only with connection head, model BSZ, BSZ-H, 1/4000, 5/6000 or 7/8000 (see "Connection head")
- 3) Only with connection head, model 1/4000, 5/6000 or 7/8000 (see "Connection head")
- 4) Without transmitter
- 5) Suitable cable gland required

Instruments marked with "ia" may also be used in areas only requiring instruments marked with "ib" or "ic". If an instrument with "ia" marking has been used in an area with requirements in accordance with "ib" or "ic", it can no longer be operated in areas with requirements in accordance with "ia" afterwards.

### Explosion protection (option)

The permissible power,  $P_{max}$ , as well as the permissible ambient temperature, for the respective category can be seen on the certificate for hazardous areas or in the operating instructions.

Transmitters have own certificates for hazardous areas. The permissible ambient temperature ranges of the built-in transmitters can be taken from the corresponding transmitter operating instructions and approvals.

## Manufacturer's information and certificates

Logo	Description
	<b>SIL 2</b> Functional safety
	<b>NAMUR NE 024</b> Hazardous areas (Ex i)

## Certificates (option)

Certification type	Measurement accuracy	Material certificate <sup>1)</sup>
<b>2.2 test report</b>	x	x
<b>3.1 inspection certificate</b>	x	x
<b>DKD/DAkkS calibration certificate</b>	x	-

1) Thermowells have their own material certificates for selected components

For calibration, the measuring insert is removed from the thermometer. The minimum length (metal part of the probe) for carrying out a measurement accuracy test 3.1 or DKD/DAkkS is 100 mm. Calibration of shorter lengths on request.

The different certifications can be combined with each other.
