Pumping Water Pumping Honor

Company profile

Nanfang Pump Industry Co.,Ltd (CNP),as a subsidiary of Nanfang Zhongjin Environment Co.,Ltd, was founded in 1991,and listed on Shenzhen Stock Exchange on December 9,2010 with stock code 300145.

In 2019, CNP's annual output exceeded 900,000 units/set with nearly 3 billion sales revenue, continuing to maintain high growth. As a national enterprise technology center, CNP has flagship ultra-high efficient product -new generation CDM (F) light vertical multistage centrifugal pump, MEI≥ 0.7. Same series high temperature pump products are developed in 2019 to satisfy high temperature applications. All light stainless steel pump product series grow stably. Advanced frequency conversion water supply equipment has been innovated to the 6th generation. Fire pump and diesel engine have obtained UL certification. TD in-line pump, NIS/NISO end suction pump, NSC split casing pump, WQ sewage pump, PQ stainless steel fountain submersible pump, BP silent tube pump, pool pump, non-blocking self-priming sewage pump, metering pump, oil pump and other pump products, can meet various application needs of different fields.

CNP has a complete sales network both in domestic and overseas market,exporting to over 60 countries and regions, maintaining long-g relationship with our clients. CNP pumps have been widely applied in various fields like water treatment, water supply and drainage, HVAC, industrial application, seawater desalination, energy and power etc.

CNP, a green water expert beside you.

Summary

CHM is non-self-priming light horizontal multistage centrifugal pump. It has compact structure with extended shaft motor and the liquid is input in axis direction and output in radius direction. The flow passage adopts the process of stainless steel plate stamping and welding, which features the pump of energy efficiency, low noise, environmental protection, beautiful appearance, light weight, convenient installation and maintenance, and high reliability.

Motor

TEFC, 2-pole motor;
 Protection class: Ip55;
 Insulation class: F;
 Standard voltage: 50Hz 1×220v
 3×220V / 380V
 3×380V
 Max. power of single-phase motor is 2.2KW

Operating condition

This pump is applied for thin, clean, non-flammable, non-explosive, solid free, fiber free, physically and chemically water-like liquid.

Liquid temperature:
 -15°C to 70°C for the normal temperature type
 -15°C to 105°C for the hot water type

Ambient temp.: up to 40°C

Max. working pressure: 10 bar

The maximum inlet pressure are limited by the maximum working pressure.

Model definition

Application

- CHM series pump is mainly used in industry:
- Air conditional system
 - Cooling system
 - Industrial cleaning
 - Water treatment (Water purification)
 - Aquaculture
 - Fertilization/measuring system
 - Environment application
 - Other specific application

Curve conditions

The requirements applies to all the performance curves below:

- All curves are based on the measured value of the motor at a constant speed of 2900rpm.
- Curve tolerance in conformity to S9906:2012, grade 3B.
- Measurement is done with 20°C air-free water, kinematic viscosity of 1mm²/sec.
- The pump use should refer to the performance range of the bold curve to prevent overheating by too little flow or motor overload by excessive flow.
